### BOOST 20.0

A floor cleaning machine designed to guarantee professional cleaning without sacrificing the small size. The Dulevo Boost 20.0 floor cleaning model is an ideal work tool for small commercial or artisan areas, easy to use and be stored in very tight spaces without creating clutter. Thanks to some very innovative solutions, it can work in a forward and backward direction, thereby making it particularly suitable to be used under tables or desks. The battery-operated version is equipped with a practical built-in charger that can recharge from any socket without having to create a specific charging space. On the other hand, the 230 V powered version is the best in terms of convenience. Not being restricted to the battery life, it is always ready to be used.

### BOOST 30.0

A professional cleaning machine for a very restricted work place. Its particular design means that, despite its minimised size and weight, the brush can exert high pressure on the ground. This allows the Dulevo Boost 30.0 floor cleaning model to clean very dirty surfaces without sacrificing manoeuvrability and lightness of use. The range has been designed to satisfy all needs and is available with or without motorised wheels. The rotation of the brush in the version without motorised wheels greatly helps the thrust of the machine, thereby making it particularly light to manoeuvre.

### BOOST 50.0

The various versions of the Dulevo Boost 50.0 floor cleaning model is a professional cleaning machine suitable to be used in any application - industrial to retail, logistics to public areas. In fact, it is an indisputable machine, specifically designed for average to heavy professional use. Although this is a professional tool, this floor cleaner is very ergonomic and particularly easy to use even by inexperienced people. All the functions work automatically by simply actuating a few buttons. Furthermore, the powerful drive conveyed to the wheels allows the operator to clean very large areas tirelessly and in total comfort. Thanks to its independence from the batteries, the 230V powered version is an ideal tool for those who do not need to clean large areas but still require a very powerful machine for heavy cleaning in emergency and unforeseen situations. In fact, the machine can remain inactive for many days and when needed, simply connect the plug to the socket.

A powerful and reliable floor cleaner that does not fail when hard work is to be accomplished.

The design, components and ergonomics of this floor cleaner are designed for heavy industrial or domestic use. In view of its professional and prolonged use, particular consideration was also attributed to the hourly cost of operation as a key factor of productivity. The Dulevo Boost 90.0 is also available with roller brushes. This particular washing/sweeping version allows you to thoroughly wash any surface without having to previously clear the area from solid debris.
