

# 8000 PROPANE-POWERED RIDE-ON SCRAPER

## FEATURES

This 2,950-pound scraper rivals 3,500-pound units. Different from hydrostat-powered units, the 8000 combines National's patented carbide angle-shank technology with the added efficiency of dual-lift hydraulic slide-plates. Consistent torque sets the operational standard for high removal rates, and each machine undergoes a rigorous quality assurance program including emissions certification.

- A. Adjustable seat with armrests
- B. Automatic kill switch is triggered when the operator seat is vacant
- C. Precise hydraulic steering for maneuvering in tight spaces, zero turn-radius, and continuous torque for higher removal rates and greater productivity
- D. Ergonomic design includes movable foot pegs and an adjustable operator's seat position for optimal comfort and line of sight; slide plate provides an additional 200 pounds of down pressure on the cutting head
- E. Quick-change swivel head
- F. Dual-lift, hydraulic slide-plate adjusts blade pitch and angle for continuous contact with the floor; standard on every 8000
- G. Larger/deepened forklift pockets
- H. Copious 21-inch non-marking tires
- I. E-stop knob for safety
- J. Liquid-cooled Kawasaki engine is re-engineered with National's exclusive catalytic design for the industry's lowest emissions
- K. Hinged hood system for easy-access maintenance
- L. Compact design fits through standard door frames and elevator doors
- M. New front cast slide-plate and debris deflector
- N. Hydraulic lock-out break system automatically engages when the machine is in the off position
